UI/UX Portfolio: igaltal.github.io/portfolio

SUMMARY

Software engineer with production experience building real-time systems in Python and C++, now focused on AI-powered products and UI/UX engineering. I build LLM-powered features end to end — from prompt design and API integration to polished React interfaces — backed by a strong systems foundation from industrial-grade infrastructure work. B.Sc. in Computer Science & Entrepreneurship.

EXPERIENCE

Voltify — Software Engineer

Sep 2024 – 2026 · Ramat Gan, Israel

- Designed and owned a simulation platform emulating hardware behavior, enabling validation of complex system behavior and failure recovery before production deployment.
- Developed device communication layers in C and C++ for industrial systems over custom protocols (Modbus, RS-485, TCP/IP).
- Deployed and debugged services on remote Linux environments with Docker; built CI/CD pipelines with Pytest and Bitbucket.
- Collaborated with infrastructure and firmware engineers on integration, performance optimization, and production debugging of multi-threaded systems.

Reichman University — Academic Coordinator

Aug 2023 – 2025 · Herzliya, Israel

- Supported 600+ CS students through academic guidance, mentorship, and onboarding; organized technical workshops and bridged students and faculty.

Consulate General of Israel — Assistant to General Manager

Dec 2021 – Aug 2022 · New York, USA

- Coordinated logistics for high-profile diplomatic events; streamlined planning processes, reducing preparation times by 30%.

SELECTED PROJECTS

Relay · Next.js, TypeScript, AI Agents

AI agent platform: point an agent at a repo — it reads the code, writes the fix, and ships it.

Personal Site & Booking Platform · React, Tailwind, Vercel Serverless

Designed and built igaltal.com end to end, including a custom meeting-booking system with availability, flexible durations, and a mobile-first UI.

AI Stock Analyst · Python, AI/ML, Real-time Data

AI-driven financial analysis tool delivering data-driven insights from live market data.

BEAM CTRL · Python, WebSocket, JavaScript

Real-time DMX lighting control from any browser — live sliders, cue playback, and a mobile show mode.

MILITARY SERVICE

Israeli Air Force — Combat Soldiers Instructor

Aug 2018 – Apr 2021

- Led specialized training programs focused on leadership development; managed classified materials with high accuracy and responsibility.

SKILLS

AI & ML

OpenAI API Claude API
Prompt Engineering
LLM Integration Scikit-learn
OpenCV

UI/UX & Frontend

Figma React Tailwind CSS
Design Systems Prototyping
User Research

Languages

Python JavaScript C++
C C# Java SQL

Tools & Systems

Docker Git Linux Pytest
Flask Redis TCP/IP
Modbus

EDUCATION

B.Sc. Computer Science & Entrepreneurship

Reichman University · 2022 – 2025
GPA: 82 · Courses: Advanced Programming, Web Development, Product Management

High School Diploma, CS Major

Amit Bar Ilan · Graduated with Honors
(110/115)

CERTIFICATIONS

Automate Everything with Python
— Udemy
Excellence in Training & Leadership — IDF

VOLUNTEERING

Ami Hai Pre-Military Academy

Led community projects and leadership workshops.

URJ Camp Harlam, PA, USA

Counselor — mentored youth aged 8–16.

LANGUAGES

Hebrew: Native · English: Fluent
Arabic: Basic reading
